Bash Script Project

Name: **Bola Weissa Kamel**

GitHub: https://github.com/bolawisa/Bash_Script_Project.git

📝 Project Description

This is a simple Bash scripting project that contains a set of basic shell scripts. The scripts are designed to help automate various tasks on Linux systems. While the project's purpose isn't explicitly documented, it serves as a practice tool for those looking to improve their Bash scripting skills or automate routine system administration tasks.

🖥️ Key Features:

- A set of useful Bash scripts for common Linux operations.

- Automates tasks such as file management, user/group handling, and more.

- Easy to modify and extend for different system administration tasks.

- Great for beginners looking to practice shell scripting**.**
